
Magnetic (Golden) Card Reader/writer

Model: SC-206U

Features:

SC-206U is a reader/writer equipment integrating the functions of reading and writing mag card, IC card, SAM card. Integrated magnetic card, bank book, IC card, SAM card reading and writing.

***Magnetic Card:**

Magnetic card manually feeding

Specially designed for financial system which can code and read information in magnetic stripe that bankbook magnetic card and operator card use.

Read and write IBM/ISO/ANSI/DIN standard magnetic card and bank book.

***IC Card:**

IC card adapts descent structure and single read and write path and order set

Read and write CPU/Memory/logical encrypting card.

Applications:

*Retail: Gift Card, Customer ID, Store ID

*Government: Driver Licence, Health Card, Government ID

*Any movable data collection Trade shows, Racing events

*Employee`s Time / Attendance data collection

*Exhibition visitors` data collection

Specifications:

Power supply	DC+24V 2.2A
card feeding speed	10cm/s-120cm/s
Record standard	compatible with IBM, ISO, ANSI, DIN
Record density	TK3/TK2: 210BPI/107 bit TK2: 75BPI/37 bit TK1: 210BPI/76 bit
Magnet head life	>500,000 times
IC card base life	>600,000 times
SAM card base life	>600,000 times
Communication parameters	1200/2400/4800/9600bps optional
	8 data bit/ 1 stop bit/ CRC optional
Environment requirement	temperature: 15%-85%
golden card reader/writer	W65mm×215mm×H58mm
Magnetic card reader/write	W65mm×215mm×H58mm
